

Predictability in a changing world

# Turbo MarineCare

Turbo MarineCare is a comprehensive, data enabled service agreement tailored specifically for marine customers operating two stroke engine turbochargers.

Existing and new build vessels can both benefit from the data driven features of Turbo MarineCare.

# Application

For Accelleron type TPL-B, A100-L and A200-L.

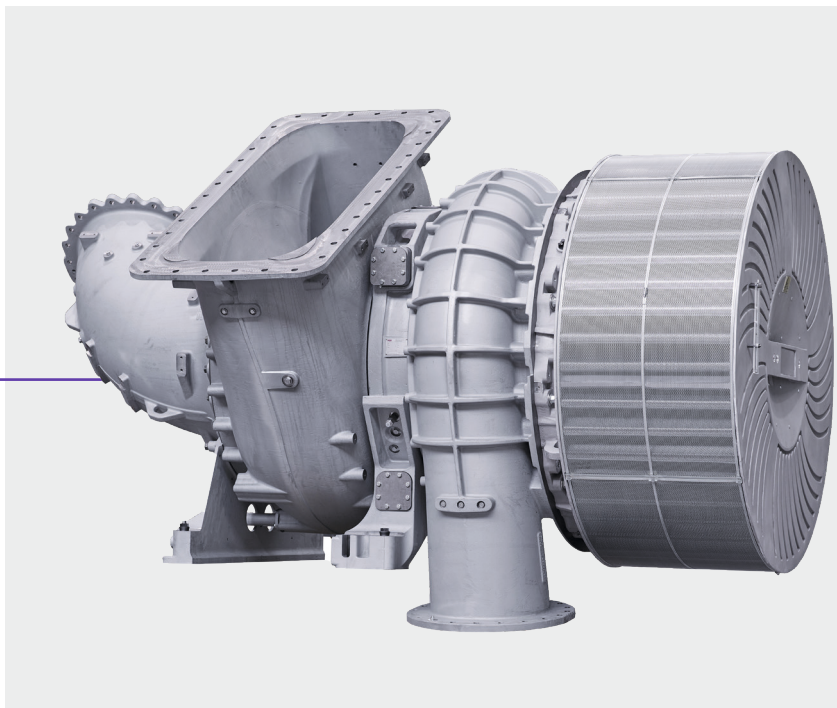

Applicable for existing ships already in operation.

Applicable for new build.

Fleet size. Any number with no minimum.

# Benefits

## Peace of Mind / Warranty

- Continuous warranty from dry dock to dry dock.
- Covers events that may arise between dry docks.
- Covering all turbocharger parts as long as the reason is related to the turbocharger operation and not an external factor.

## Clarity on equipment health

- Health assessment of turbocharger through analysis of operational data.
- Enabled by continuous sharing of data.
- Allows for monitoring of turbocharger status.
- Early warning sent for any potential issues.

## Ease of doing business

- Simplification of turbocharger service management through a single integrated package.
- Complete scope of service (standard spares, wear & tear and labor) in a single purchase order.
- Including services in different dry dock countries.
- Efficient execution with reduced administration.

## Financial predictability

- No cost overruns from unexpected parts replacement and overtime.
- Fixed price for complete dry dock turbocharger overhaul.
