Accelleron simplifies digital emissions reporting with direct link to ClassNK portal

- Seamless cross-platform functionality to streamline reporting for users of Accelleron's Tekomar XPERT emissions module
- Accelleron becomes latest platform to feature integration with Japanese class society emissions verification service
- Addition of link to second major class verification portal delivers greater flexibility to Accelleron's digital customers

Baden, Switzerland, June 23, 2025. Accelleron has further simplified emissions reporting for users of its digital solutions after collaborating with Japanese class society ClassNK to establish a direct connection between Tekomar XPERT marine's emissions module and the ClassNK MRV portal.

Under European and IMO regulations, emissions reports need to be verified by an accredited entity before being submitted to the relevant authority. Tekomar XPERT's emission module automates the collation of ship emissions data into the format required for various regulations – including the EU Monitoring, Reporting and Verification (MRV) Maritime Regulation and IMO's Data Collection System – and streamlines submission to accredited verifiers, including ClassNK.

With the new agreement, shipping companies can submit their reports to the ClassNK MRV Portal at the click of a button. The integration reduces manual effort for both the shipping company and the verifier and enables the verifier to detect issues with submitted documents faster, further reducing administrative burden.

Tekomar XPERT is the latest platform to be granted integration with ClassNK' s portal, joining a set of trusted and well-established digital reporting tools. The new agreement also increases flexibility for Tekomar XPERT users, which can now benefit from single-click integration to verification portals from both ClassNK and China Classification Society (CCS).

As of the end of April 2025, ClassNK has provided GHG verification services under the IMO-DCS framework for approximately 6,000 vessels. Each of those vessels will now be able to benefit from single-click submission for verification when Tekomar XPERT's emissions module is installed.

Accelleron Global Head of Sales and Operations, Digital Solutions, Shailesh Shirsekar, said: "This is not just a software feature, it is an important step toward smoother cross-platform collaboration. As the burden of emissions regulatory compliance continues to increase, Accelleron is working across the maritime value chain to ensure simple, straightforward time-saving solutions for users of its digital platform."

2/2   **Accelleron Industries Ltd** (ACLN: SIX Swiss Ex) is accelerating sustainability in the marine and energy industries as a global technology leader in turbocharging, fuel injection, and digital solutions for heavy-duty applications. Building on a heritage of over 100 years as a trusted industry partner, the company serves customers in more than 100 locations in over 50 countries. Accelleron's 3,000 employees are continuously innovating to deliver best-in-class products, services, and solutions that are mission-critical for the energy transition.
